EDUCATION

B.E. | Information Technology | Savitribai Phule Pune University
P.E.S. Modern College of Engineering, Pune

CGPA: 8.57

2024

TECHNICAL SKILLS

Languages: JavaScript (ES6+)

Frontend: React.js, PrimeReact, Yup, React Hook Form, Tailwind CSS, HTML5, CSS3

Backend & Database: Node.js, Express.js, MongoDB, MySQL, Supabase

Tools: Git, GitHub, Postman, Docker, Flowise, MongoDB Compass, MongoDB Atlas, Firebase, Vercel, Render

WORK EXPERIENCE

Associate Software Engineer | Tech Mahindra (Pune)

(Dec '24 - Present)

- Developed a **role-based healthcare management application** using **React.js**, supporting **Admin, Provider (Doctor), and Patient** workflows
- Built responsive **Patient and Provider management modules** using **React.js and PrimeReact**, enabling user registration, profile management, and seamless data operations through **RESTful API integration**
- Developed a **doctor availability module**, allowing patients to view provider schedules and available appointment slots
- Created **responsive and reusable UI components** using **PrimeReact**, improving application usability and maintainability
- Integrated frontend components with backend services using **REST APIs** to ensure seamless data exchange and user interactions
- Participated in **frontend feature development, bug fixing, and application enhancements** throughout the software development lifecycle

Software Engineer Trainee | Techonsy Software Pvt. Ltd. (Pune)

(Sep '24 - Dec '24)

- Engineered scheduled serverless functions in **Supabase** using **cron jobs** to automate daily data extraction
- Eliminated reliance on **paid crawling services**, achieving **zero additional cost** while ensuring secure and reliable data storage
- Integrated **LLMs** to **automate** workflows, reducing manual effort and accelerating output generation.
- Deployed a **Flowise chatbot** with **Agents** and **RAG**, automating query handling and delivering accurate, context-aware responses

PROJECTS

GuildMasters Website [GitHub](#) | [Website](#)

- Developed a **React** platform with reusable components and dynamic routing, delivering a structured and engaging experience for gamers to explore titles, events, and insights
- Implemented secure user authentication using **Node.js, Express.js, JWT, Cookies**, and **MongoDB Atlas**, with the backend deployed on **Vercel** for reliable performance
- Deployed the fully responsive and interactive frontend on **Firebase**, ensuring seamless accessibility across devices

Portfolio Website [GitHub](#) | [Website](#)

- Developed a **modern animated portfolio** using **React, Tailwind CSS, Framer Motion**, and **Swiper** to deliver a fully responsive and visually engaging user experience
- Developed a **Node.js backend with Express** to handle contact form submissions and integrated **MongoDB** for secure and structured data storage
- Deployed the application on **Vercel** with optimized performance, smooth animations, reusable components, and clean, scalable code architecture

Visual Master [GitHub](#) | [Website](#)

- Developed a website using **ReactJS, API, WebSocket**, and **ChartJS** which visualizes real time stock market data and crypto data through graphs for better understanding, particularly catering to newcomers in the stock market world. Set up and deployed a website on cloud based platform **Vercel**
- Built backend with **Flask**, enhanced security with **JWT authentication**, used **MongoDB** to store authenticated data
